

The **NEW** Refrigerant Handling Qualification...

...to help reduce **global warming.**

On 4th July 2010 the new European F Gas Regulation (EC) No 842/2006 which includes commission regulation (EC) No 307/2008 comes into force.

If you are involved in the service or repair of Mobile A/C Systems.....this affects you!!!

DON'T RISK A HOT FINE... OR BE LEFT OUT IN THE COLD!!

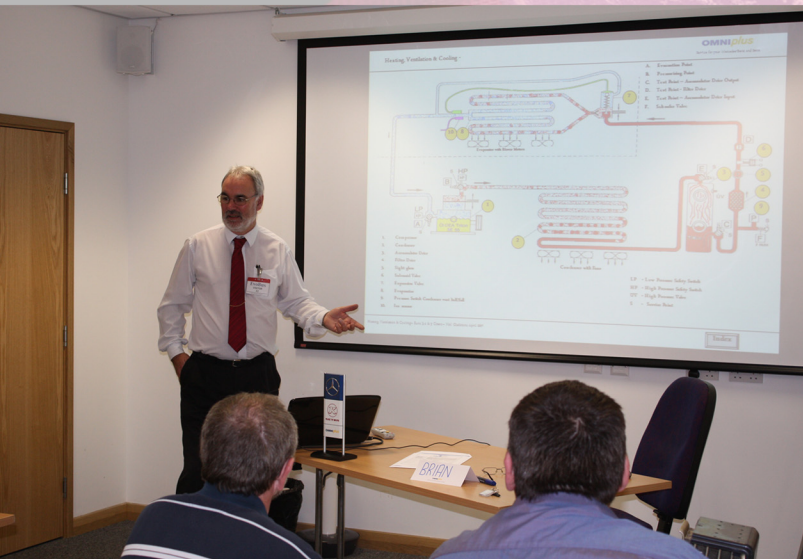

Challenge:

The Regulation legally requires **all AC technicians to be Assessed & Certified before July 2010.** The high volume of technicians involved makes acting early the only way to ensure that they are cost effectively trained and qualified in preparation for 4th July 2010.

Solution:

AACTA offers a cost effective and convenient solution to your training and assessment requirements in association with the City & Guilds 5101-301 group of qualifications. (See overleaf).
