

## Dry-Air Flushing Kit

*Once an A/C system has been flushed it will guarantee that the system is clean & free from old oil & any debris.*

*Simply connect the gun to one end, then connect the draining tube to the other of the part you wish to flush through, push the flush through until it runs clear.*

41-50014

## Nitrogen Flushing Kit

*Perfect for the mobile engineer, a self contained tool that works right out the box!*

*This flushing kit works the same way as the Dry Air kit does, and with the same flushing agent, without the need for compressed air.*

*Supplied in a handy storage cage.*
