CO2 AIR-CONDITIONING TOOLING & CONSUMABLES

Sourcing CO2 tooling and consumables has only been possible, up to now, through the main dealerships.

We are pleased to announce that, for the first time, our **NEW** range of CO2 consumables and tooling is available to the UK aftermarket.

CO2 is currently used in brand new vehicles such as BMW, MERCEDES and some of the VAG range, with more manufacturers set to follow.

CO2 tooling and consumables are set to be in greater demand especially in electric/hybrid vehicles.
